

We Use State-of-the-Art Logistics to Calibrate Every Biotech Move

With decades of experience moving some of the world's foremost biotech companies, we know that careful planning and precision are minimum requirements when moving biotech equipment.

Our staff has the experience and necessary equipment to relocate bio-safety cabinets, incubators, minus 80 freezers, centrifuges, HPLCs, microscopes and all of the other lab and manufacturing equipment needed by leading-edge life science companies. Just ask UCSF-Mission Bay and companies like Genentech, Chiron-Novartis and Bayer.

NOR-CAL Moving Services:

Top People—NOR-CAL's foremen and drivers have an average of 10 years' service with our company, guaranteeing quality, skill and project continuity.

Industry Leader—NOR-CAL moves more companies than the next three movers combined.

Planning—NOR-CAL's professional account representatives are the most experienced in the industry. They bring cost- and time-saving planning expertise to every move.

Asset Management—NOR-CAL's On-Line Storage management system leads the industry, enabling you to direct the handling of your stored assets from your computer.

Easy Access—With three Bay Area warehouse facilities totaling over 400,000 square feet, we provide service to you in a timely manner wherever you are located.

Focused Staff—NOR-CAL drug screens all job applicants prior to employment and regularly conducts random tests to ensure quality performance.

Scope of Service—Office relocations, modular furniture installations, storage, seismic bracing, household goods relocations, shelving, warehouse relocations, material handling, library relocations and light rigging.
